KING AND QUEEN OF SPAIN-DR. FERRER, AGITATOR, WHO WAS SHOT.

The execution of Dr. Francisco Ferrer, the Barcelona revolutionist, by order of a Spanish oourt martial stirred the Socialists throughout Europe as nothing else has in years. Ferrer was long regarded as one of the most prominent men in the Liberal cause in southern Europe, and his death aroused his followers to the point of rioting in Paris, Rome, Trieste, Brussels and other centers. Stolld as the Spanish ministry is under such crises, its members are unable to concent the alarm over the safety of King Alfonso, for he was warned in hundreds of letters that if he allowed Ferrer to be shot he should pay the penalty with his own life. Queen Victoria, who was in a state of terror during the Barcelona uprising, cannot dispel the fear that her husband will be made the victim of Ferrer's avengers.
